

# ReadablePDF.com

ReadablePDF.com is a cloud service that create lifelike speech from any text. The result audio file will be uploaded to Cloud and allow it to be accessed from anywhere. A QR code image will also be created and be send to user's email. You can insert QR code image into any document and turn it into a readable document.

Currently a lot of apps includes QR Code scanner, such as Facebook, Twitter, WeChat etc. Also iPhone and iPad have build-in support in camera app.
